VAMP TIPS WITH T3 LED/UV SPARKLE GEL

SERVICE TIME: Full Set/Maintenance 1 ½ - 2 hours
(Depending on the skill level of the technician)

Our newer Vamp tips fits the nowadays trends in nail styles and easy application. This unique tip has an extreme pointy end and a perfect “C” curve on the free edge. Available in 100 count and 360 count box, in a clear color for designs.

Nail Preparation:

1. Spray the hands of the clients and yours with Cuccio Pro™ Antibacterial Spray.
2. Using a cuticle pusher, gently push back the cuticle.
3. Shape the free edge of the natural nail with a 220 grit file.
4. Using a 180 or higher grit remove the shine from the nail plate.

Step-by-Steps

1. Follow the steps of Nail Preparation.
2. Cuccio Pro™ Vamp Nail Tip doesn't have a well just apply a thin line of adhesive on contact area and apply at the very end of the free edge. This application is going to help to adjust the “C” curve.
3. Using a 180 grit file, blend the tip with the natural nail. Do not use a lower grit file, as it will leave marks on your tip.
4. If you want a stilleto style dont cut the tip. For other shapes just cut to desired shape.
5. Apply Cuccio Colour™ Veneer FUSE #2 on natural nail only.
6. With a gel brush apply a layer of Cuccio Pro™ T3 Sparkle Gel.
7. Cure the application in a UV lamp for 2 minutes or 1 minute on a LED lamp.
8. Apply a second coat of Cuccio Pro™ T3 Sparkle Gel.
9. Cure the application in a UV lamp for 2 minutes or 1 minute on a LED lamp.
10. Apply a second layer and form the apex with clear LED gel.
11. Cure the application in a UV lamp for 2 minutes or 1 minute on a LED lamp.
12. Remove the tacky layer with Cuccio Pro™ Finishing Wipe.
13. Using a 180 file shape the nail.
14. To finish use a Cuccio Pro™ UV Gel Top Coat.
15. Cure the application in a UV lamp for 2 minutes or 1 minute on a LED lamp.
16. Finish with Cuccio Naturalé™ Cuticle Revitalizing Oil.
